

INRULE® PROCESS AUTOMATION

InRule Technology® is an intelligence automation company providing integrated decisioning, machine learning and process automation software to the enterprise. By enabling IT and business leaders to make better decisions faster, operationalize machine learning, and improve complex processes, the InRule® Intelligence Automation Platform increases productivity, drives revenue, and provides exceptional business outcomes.

More than 500 organizations worldwide rely on InRule for mission critical applications. InRule Technology has been delivering measurable business and IT results since 2002.

InRule transforms decisions, predictions and processes through a unique combination of no-code AI powers – Intelligence Automation. Read on to find out about our error- and hassle-free solution for processes, InRule Process Automation.

TRANSFORMING WORK

Free team members to do what they do best by leveraging automation to do what it does best. InRule Process Automation gives non-technical users the power to raise productivity by optimizing workflows, consolidating data sources and deploying new process automations quickly and easily.

AUTOMATION OF COMPLEX WORKFLOWS AND PROCESSES

Build, test and deploy process and workflow automations without burdening IT. The low-code InRule Intelligence Automation Platform enables business users and subject matter experts to create process applications quickly and easily through plain-language menu and commands.

SEAMLESS SAAS INTEGRATION

Consolidate data without disruption. The InRule SaaS platform successfully integrates with ERPs, legacy systems, CMSs and popular CRMs like Microsoft Dynamics® 365 and Salesforce.

ELIMINATING ERRORS THROUGH STRUCTURE

Ensure proper outcomes, every time through structured, consistent processes. Inventory management claims adjudication and HR onboarding are among many administrative functions ripe for automation.

INTUITIVE, ATTRACTIVE INTERFACE

InRule promotes adoption through an intuitive, easy-to-use interface. Create, coordinate and collaborate on process automations and operational efficiencies.

EXPERT GUIDANCE EVERY STEP OF THE WAY

Launch automation quickly with confidence. Technical support staff is ready to help with process development, modelling, application building, business architecture and information management.

ESSITY CONSOLIDATES HALF A CENTURY OF LEGACY DATA

Founded in 1975, with roots stretching back to 1984, Stockholm-based Essity has grown through acquisitions and consolidations to one of the leading global suppliers of health and hygiene products. Today, the company employs more than 47,000 people across Europe, North America, Latin America and Asia and generates annual revenues exceeding \$120 billion SEK.

The conglomerate's management realized its phalanx of disparate, siloed systems needed to be tamed. InRule Process Automation provides their user-accessible solution to consolidate data sources and digitize manual operations. Through integration with Microsoft Power BI, low-code automation empowers business users to impose structure and consistency on repetitive, error-prone tasks. With automation on board, Essity is empowered to move forward at the speed of business.

“Thanks to process automation, we’ve evolved our ways of working. We’re more competitive, agile and efficient.”

Dana Elkin,
Essity Assortment
& Forecasting Manager NA

TOI-TOYS COMPLIES WITH CONFIDENCE

Founded in 1991, Toi-Toys International is one of Europe's largest toy merchants, serving retailers, wholesalers, shop owners and food-service establishments across the continent. Operating in one of the most highly regulated product categories, a major concern for the company is legal compliance. Assuring adherence to the many laws pertaining to every market in which they sell proved an ideal task for InRule Process Automation.

Through low-code automation, Toi-Toys' compliance staff gains transparency to their entirety of legal and regulatory program. They enjoy control, agility and a level of confidence far beyond when they relied on spreadsheets.

“Process automation gives us ease of mind. For compliance, InRule is on a completely different level to spreadsheets.”

Bart Daams,
Toi-Toys Regulatory Affairs
& Compliance Manager
